ABOUT ME

After several years working in the security field, I completed a Technological Specialisation Course in Mechatronics Technology. Once I started working in this area, I discovered a growing interest in the digital world and, eventually, a true passion for FrontEnd Development. To further enhance my skills, I completed the FrontEnd Engineer program at EDIT.

I describe myself as an adaptable, dynamic, and detail-oriented professional, with a perfectionist and self-demanding mindset. I am fully dedicated to the tasks I take on, always bringing a positive attitude and problem-solving skills to my work.

BM-Metal

2024-2025

CNC Machining Operator

Interpretation of technical drawings, operation and monitoring of CNC machines, performing necessary adjustments, ensuring the quality of parts through measurements and tests, as well as carrying out basic maintenance and machine cleaning.

Prosegur

2014-2024

Ensure the safety of people, property, and facilitiesControl access of individuals, vehicles, and materials, conduct regular patrols to prevent theft, damage, or risks.

Respond to emergencies such as fires, evacuations, or first aid situations.

HOBBIES

In my free time, I enjoy 3D design and printing, creating parts from initial concept to finished product. I am also passionate about electronics, having completed several personal projects, including the creation of a custom arcade machine, where I managed the entire process from design to the electronic implementation.
